Good Friday Morning, 6th Octave of Pentecost

May the Spirit of the Gospel and the Holy Word be Always in our Minds, on our Tongues, and in our Hearts.

Holy Virgin Mary and All Saints - Pray for us!

Index Number 1553:

—
This morning's prayers and meditations briefly reflected on the fragment of a Dream I woke-up with in my mind. Since I rarely remember them I consider those I remember as possibly

Significant, and try to Glean something from them – and that process of engaging will more solidify the fragments in memory and over a longer period might become significant or assembled with others.

This was a clear period of Dream time where I was walking barefoot through puddles of different primary colored paint – and the paints did not mix but held their boundaries even though they overlapped. I was and am reminded of those 'poster board' paints where the color were vivid and had a certain thickness - viscosity.

As I walked through I was thinking on how they would layer my feet .. which would not normally happen – as they would mix – but this Paint was different – and I would have a recording of all the puddles I stepped in.

The 'background' is a little vague now but was solid in Dream. I was in and around a limited area – like a rural town, there was a train bridge and an overpass and I was also inside building. Other people were around and something was happening where everyone was involved, although in a kind of meandering way.

I was limited in where I could go – as if there was a fence a distance from me, a few blocks of distance, and I felt like I was being supervised and monitored, like I was in an Institution although free to visit the town and be involved in a kind of normal manner .. and a woman was 'in charge' and although I did interact with her, it was a small part of the time.

The colored puddles were not everywhere, at least I only remember walking through them at the very end of the memory of the Dream.

—

The institution aspect seems clear – as this reality seems more and more 'Managed' .. I have stopped taking the news or world events seriously – except to make point and point out aspects which might be useful to high-light. I have fallen back to the Model where all that in the news actually happened at some point, in the sequence of Days-of-Bread that ran before – before I was 'engaged' and so is a 'read-only' situation – and all the suffering and such already happened and is being presented for the uncountable number of times in this repeat Day-of-Bread .. I am 'IN the World, but not OF It' is becoming more clear.

Like a very sophisticated Trolley Problem, well many of them in a row, in this Holy Simulation.

—

Which got me thinking of two versions I have posted recently.

The first is related to my argument written about how the biblical 'Wedding at Cana' where Mother Mary must prompt Jesus to 'do something' about the lack of wine ..

(prompting His 'water-to-wine' Miracle and start of His Ministry, although He was planning to Wait for some future time or occasion – His memory of the sequence of events in that run through the repeating 'Days-of-Bread' on that Multiverse Path for which was very successful in other times on the Multiverse – and would and expected to repeat the sequence, because .. why not – it was successful – and now here is Mother Mary getting Him to 'do something' and Start earlier .. all mothers are pains-in-asses sometimes I suppose, but showing us that Holy Mary is the one to Ask!)

.. otherwise – I argue – that The Father's Will for Jesus and us all will lead to Better Holiness – as long as we do not Sin, and things are how they should be in this overall course of events – that the wine running-out was God's Will (perhaps a guest would have drunk too much and committed a sin, or not done something Significant, or ..) and so was reluctant to Act – because such Action start a 'ripple' which needs then constant adjustments, perhaps.

I discuss this in a number of posts which contain 'the Trolley Problems' and the Luminous Mystery Holy Rosary (or Chaplet), the one which these overlap is Post, **August 5th, 2021, Thursday Morning, 'Index Number 1058:'**, ..

Now where was I? ..

.. the Trolley Problem – this one were your 2 children (son & daughter to further tease-out values I suppose) are at risk, you have the switch that has 3 settings – forward to run-over one, and back to run over the other, and leave as is and the Trolley will between them and then turn back and run-over both.

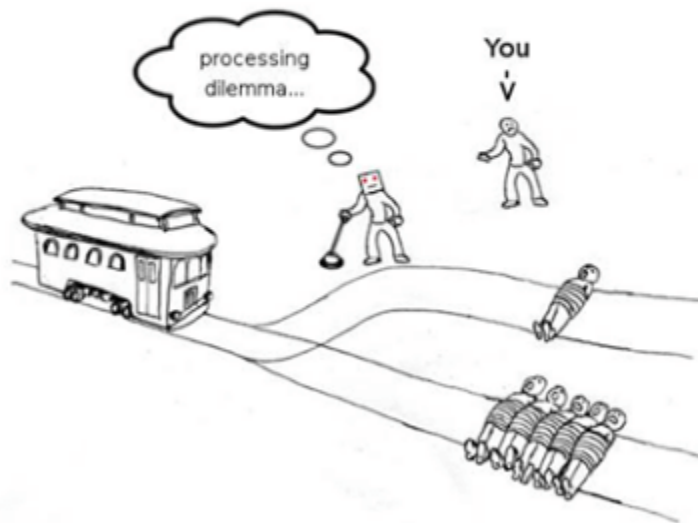

So in this situation it is time to look at the situation in a Wider View. Who put them there – kidnapped and set up the situation, arranged for you to be there .. what are the Ethics of such Horrors .. and why would they let anyone live after – if willing to kill both or arrange to have you kill them both. (***A bit like our Satanic gov and Voting***)

So the choice is to leave the switch alone – same answer as I derived in the above Post – for pretty much the same reasons – and adding this element of Discernment.

.. of course if a 4th choice existed to save both, then that would be the time to get involved (to Vote), but even still – given the Horrors of the ethics of those in Power, will they not kill us all for Organs or the fun of it anyway, but the few minutes or longer you delayed the deaths would be worth the engagement.

The Artificial Intelligence Trolley Problem

You've been replaced by a fully sentient robot you have designed.
Would you still being held morally responsible for the outcome of
the situation?

I like this one .. I think it applies nicely to me – us – in these Holy Simulations and the Shaping of the AI to prompt and force a Deeper personal study – and the answer to the Question is that you are only responsible to the point at which you personally Arranged the situation – allowed your AI to be put into that situation – regardless if it reflected what your choice would have been .. but for me the correct choice is to not engage – to not change the existing State, as I have outlines.

If the AI does differently, then it would further not reflect me and so would not be a full-enough version to be placed in that situation, so the responsibility for the wrong choice – which I argue is ANY engagement – would not be my responsibility.

Since – as I have mentioned above – this Holy Simulation is seeming more Shallow .. so as if I have been Projected or Projecting myself into FlatLand, ..

Flatland: A Romance of Many Dimensions is a satirical novella by the English schoolmaster [Edwin Abbott Abbott](#), first published in 1884 by [Seeley & Co.](#) of London. Written pseudonymously by "A Square",^[1] the book used the fictional two-dimensional world of Flatland to comment on the hierarchy of Victorian culture, but the novella's more enduring contribution is its examination of dimensions.^[2]

Several films have been made from the story, including the feature film *Flatland* (2007). Other efforts have been short or experimental films, including one narrated by [Dudley Moore](#) and the short films *Flatland: The Movie* (2007) and *Flatland 2: Sphereland* (2012).^[3]

Plot [\[edit\]](#)

The story describes a two-dimensional world occupied by geometric figures, wherein women are simple line-segments, while men are polygons with various numbers of sides. The narrator is a square, a member of the caste of gentlemen and professionals, who guides the readers through some of the implications of life in two dimensions. The first half of the story goes through the practicalities of existing in a two-dimensional universe as well as a history leading up to the year 1999 on the eve of the 3rd Millennium.

On New Year's Eve, the Square dreams about a visit to a one-dimensional world (Lineland) inhabited by "lustrous points". These points are unable to see the Square as anything other than a set of points on a line. Thus, the Square attempts to convince the realm's monarch of a second dimension, but is unable to do so. In the end, the monarch of Lineland tries to kill the Square rather than tolerate his nonsense any further.

Following this vision, he is himself visited by a three-dimensional sphere. Similar to the "points" in Lineland, the Square is unable to see the sphere as anything other than a circle. The Sphere then levitates up and down through the Flatland, allowing Square to see the circle expand and contract. The Square is not fully convinced until he sees Spaceland (a tridimensional world) for himself. This Sphere visits Flatland at the turn of each millennium to introduce a new apostle to the idea of a third dimension in the hope of eventually educating the population of Flatland. From the safety of Spaceland, they are able to observe the leaders of Flatland secretly acknowledging

the existence of the Sphere and prescribing on the silencing. After this proclamation is made, many witnesses are massacred or imprisoned (according to caste), including the Square's brother.

After the Square's mind is opened to new dimensions, he tries to convince the Sphere of the theoretical possibility of the existence of a fourth and higher spatial dimensions, but the Sphere returns his student to Flatland in disgrace.

The Square then has a dream in which the Sphere visits him again, this time to introduce him to Spaceland, whereof the Point (sole inhabitant, monarch)

How much a loss a Livery and Opportunity every passing year as we Slide further into #CntHell, with each generations of our children twisted more into the howling-horrors make clearly are – ready to do Satan Bidding – Directed by the Witch-Matriarchy rulers?

A group of selected clips discussing his recent book – very likely good, if – as usual for his work – we pretend the evil-Zionist Witches are not orchestrating the destruction from the power position, and we all shifting around in a 3 or 4 'bad-choice' situation where no Solution possible and constant failure guaranteed because of the Adaptive Evil being applied – no normal solution, that is .. welcome to FlatLand where those in Power will torture-to-death all our children after making us pick the order, thinking some might be saved by playing-along., ..

Here is her part in that debate that was mentioned by Jordan P (her father) with Dawkins.

She makes the best point – that we are all different and what you can eat to stay healthy is not necessarily what others can .. and only howling-retard Authoritarian vile cnt and brain-damaged typical women filled and directed by Female-Evil – would even consider that they could limit your choices.

We have too many in power and pushing evil – Censoring, controlling our minds – Vagina-god Satan following Vag-Supremacists and vicious 'motherlying' horrors – they are so brain-F-ing evil to imagine they have any idea what is best for others.

Also - She could have talked about the high-density of pesticides and related poisons, endocrine disrupters, and toxicness that false-meats contain.

Here are a group of people who would like to do my extreme sport of Hang Glider Dog-Fighting.

And such would be great not only for spectators, Athletes and those who would like such in a non-competition use – like those formula-one sports, of the Sailing races where people spend huge effort, technical abilities, and such to make better Tools for the Athletes to compete – Imagine my thoughts below in the minds of DARPA engineers and how long until we can have Active Gliders that mimic a bird-of-Pray in performance (to Scale)?, ..

[Quote-On]

It's a sporting concept .. extreme sporting.

Something I want to see, or if I were younger and healthy and wealthy enough - to do myself.

Imagine a cargo plane flying high and the back ramps opens and there are many hang-gliders dispersing, each controlled by one person wearing a para-shoot, radio, sitting and also wearing version of ice-climbing boots, and cameras pointing in all directions.

The hang-gliders may be modified with hooks on the end of the wings, and perhaps some ability to partially fold the wings to bank & dive like a bird of pray ...

After a few minutes – say 5 minutes - after deploying the 'dog-fighting' starts with a “Start” command over the radio – each struggling for position to streak down or across and shred a wing.

Fighting ends when below a safe altitude to eject and para-shoot to safety.

Also - when you eject - drop away to open shoot - the hang-glider should then burst into smoke and maybe flames a few moments after separation.

Team sports might involve players purposely sacrificing selves by colliding with others to remove them (both) from play.

Last one flying wins.

If you manage to land with a damaged glider – extra credit.

What do you think? With 3D tracking and many camera angles .. who couldn't enjoy watching both the 3D glide paths displayed and the views?

[Quote-Off]

Fun stuff to watch. Sciencey that everyone can enjoy.
