

Boiling the Frog and US Mission Creep in Ukraine

Today I'm going to show you how a frog is incrementally boiled alive without being aware of it. But in this case the frog is the American people, the pot is the conflict in Ukraine, the Biden administration is the one cranking up the heat, the flame is direct US military involvement, and the end recipe is open war with Russia, potentially leading to World War III.

On [Dec 8th 2021](#) - Biden promised the American people and the world that there will be “No boots on the ground” in Ukraine:

“The idea that the United States is going to unilaterally use force to confront Russia invading Ukraine is not in the cards right now.” & “That is not on the table”

On [Feb 23rd](#) - the Pentagon vehemently tells us that US troops will not become involved Ukraine: “Absolutely not,” a Pentagon official added. “No one wants to risk nuclear war with Russia over Ukraine.”

On [March 1st](#) – Biden declares during the State of the Union Address "Let me be clear -- our forces are not engaged and will not engage in the conflict with Russian forces in Ukraine," [Thousands more US troops are being deployed](#) to Europe - not to fight in Ukraine we are told, "but to defend our NATO allies in the event that Putin decides to keep moving west. For that purpose, we have mobilized American ground forces, air squadrons, ship deployments to protect NATO countries, including Poland, Romania, Latvia, Lithuania, and Estonia,"

In what is brushed off by his handlers and the media as just another patented Biden “gaffe”, Biden tells US troops in Poland about the conflict just across the border in Ukraine “You’re going to see when you’re there, and some of you have

October 5th – Anonymous US intelligence officials, reveal to the Intercept growing clandestine American operations inside Ukraine.

“There is a much larger presence of both CIA and U.S. special operations personnel and resources in Ukraine than there were at the time of the Russian invasion in February. Secret U.S. operations inside Ukraine are being conducted under a presidential covert action finding.”

When it became clear that the agency’s predictions of a rapid Russian victory had been wrong, the Biden administration sent the clandestine assets that had been pulled out of Ukraine back into the country, the military and intelligence officials said. One U.S. official insisted that the CIA only conducted a partial withdrawal of its assets when the war began, and that the agency “never completely left.”

Yet clandestine American operations inside Ukraine are now far more extensive than they were early in the war, when U.S. intelligence officials were fearful that Russia would steamroll over the Ukrainian army. There is a much larger presence of both CIA and U.S. special operations personnel and resources in Ukraine than there were at the time of the Russian invasion in February,

several current and former intelligence officials told The Intercept.

And on [October 31st](#) – The Boots are officially on the ground. A Senior US defense official admits to the Washington Post that an unspecified number of uniformed active duty US military troops are on the ground in Ukraine supposedly “inspecting US weapons caches”.

WASHINGTON — A small number of U.S. military forces inside Ukraine have recently begun doing onsite inspections to ensure that Ukrainian troops are properly accounting for the Western-provided weapons they receive, a senior U.S. defense official told Pentagon reporters Monday.

Inspecting weapons. In a war zone. Sure they are. We've all heard this "advising & training" bullshit before in Syria, in Vietnam. We all know where this is going and how this ends. Its called mission creep. You are being desensitized incrementally through the media to direct US military involvement and war with Russia in Ukraine.

So – thousands of Western “mercenaries”, CIA, US Special Forces, European commandos and now uniformed active-duty US military troops are all on the ground in Ukraine, involved in the conflict supporting the Kiev Putsch regime, all presumably wearing boots.

What happen when some American boys and girls in uniform are inevitably “caught up in the conflict” in the war zone, killed by Russian troops, and returned to Dover Air Force Base in

flag-draped coffins?

How many have ALREADY been killed and their corpses repatriated in secrecy under the cover of night?

Or vice versa when Russian boys and girls in uniform are killed by active duty US troops in Ukraine?

Is there any way that this does not end in World War 3?
